

Summary of the third day of the EXPO KATOWICE International Trade Fair

The third day (6.09) of the EXPO KATOWICE International Trade Fair is behind us. Today at the Katowice International Congress Center, further thematic panels were held as part of the conference: "Industry 5.0 - Transformational Challenges of the Industrial Sector," 'Where Industry Meets the Future' and "New Horizons of Cities." Another interesting highlight was the presence of Olympic champion in the sport walk from Tokyo (2021) - Dawid Tomala, who walked at ...Olympic pace around the trade fair hall, cheered on by Exhibitors and President Iwona Gramatyka.

This year's 20th EXPO KATOWICE International Fair also featured the third edition of the "Innovation in Industry EXPO KATOWICE" competition for university students and student scientific circles. This year the competition was prepared by the fair organizer and DAMEL S.A.. The results of the competition were announced on the main stage and the winners were honored. Prizes were handed out by EXPO Katowice SA President Iwona Gramatyka, accompanied by DAMEL S.A. CEO. Leszek Stokłosa and the company's vice presidents Andrzej Migas and Robert Tomaszewski.

The purpose of the Competition is to promote and popularize talented university students in the field of industry, including robotics and automation, mining, geology, mechanics, electrical and electronics, IT, machine and equipment design, as well as to promote the and contribution to the development of the Polish and global industrial economy, in line with global ecological trends.

Competition results:

- First place - student scientific circle of constructors SKNK MechaniCAD - Hydrive - hydrogen-powered car;
- Second place - scientific circle FOCUS - AGH Cracow - Robots cooperating with a vision system;
- Third place - AGH Space Systems - Turbulence rocket - the first student liquid fuel rocket.
